COURSE: ZYGOMATIC IMPLANTS

SPEAKERS

GOALS

- Understanding the possibilities of treatment in edentulous patients
- Evaluate possibilities of surgical treatment in jaws with extreme bone resorption in comparison with bone grafts
- Obtain knowledge for surgical and prosthetic rehabilitation of patients treated with zygomatic implants

THEORETICAL PROGRAM

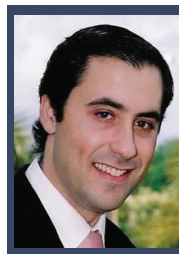

- Zygomatic implants: History and concept
- Anatomical principles
- Indications, preoperative examination and radiological evaluation
- Surgical Protocols (number and position of implants; intra, extra and combined-sinus approaches)
- Reverse Planning, Prosthetic and Laboratory Protocols
- Biomechanical considerations and postoperative care
- Complications of treatment, advantages and disadvantages
- Immediate Function and innovations

THEORETICAL-PRACTICAL PROGRAM

- Hands-on training using models and dummies for implant training

PRACTICAL PROGRAM

- Live surgery in patients

FERNANDO DUARTE, DDS, MSc

- Master in Oral and Maxillofacial Surgery at Eastman Dental Institute
- PhD student - University of London
- Lecturer at Instituto Superior de Saúde do Alto Ave - ISAVE
- CEO and Clinical Director of Clitrofa - Trofa
- International Scientific Consultant SIN - Implant System
- Author of several scientific publications
- Exclusive Private Practice of Oral Surgery and Implantology

LEANDRO LEÃO GUERRIERE, DDS

- Specialist in Implantology by INEPO
- Postgraduate – MBA in Management Excellence – FAAP
- Teacher of the specialization of INEPO
- Professor of Advanced Surgery and Zygomatic Implants courses of INEPO
- Scientific Consultant SIN – Implant System

GUSTAVO PETRILLI, DDS, MSc

- Master in Health Sciences – Heliópolis Hospital
- Specialization in Implantology – INEPO
- Specialization in Oral and Maxillo-Facial Trauma Surgery – UNIBAN
- Professor of Advanced Surgery and Zygomatic Implants courses of INEPO
- Scientific Consultant SIN – Implant System
